OVERVIEW

Designed for working professionals who want to gain technical mastery in the rapidly growing field of cybersecurity. You will learn from three outstanding research-based programs.

Learn how to assess, prevent, and manage information and systems security-related risks by applying systems security management and post-breach practices through hands-on, interactive classes.

Expand your career with the Eller Master's in Management Information Systems (MIS) program, delivering a top-five ranked program for more than 30 consecutive years.

Solve the challenges of today's tech-driven business world by learning to use IT to support business processes and strategic needs. You'll gain valuable skills in enterprise data management and will learn to analyze business and rethink business processes.

Amplify your career potential by learning with our world-renowned MIS faculty and doing so fully online. Solve the challenges of today's tech-driven business world by learning to use IT to support business processes and strategic needs.

There's no need to leave your job, and several start date options per year mean you can apply and dive right in soon afterward. You can finish in as little as 10 months—transforming your work opportunities forever.

Develop a foundation in the principles and practices of entrepreneurship and innovation with the skills and tools you need to lead as an entrepreneur, whether in your own startup or a corporate setting.

You will emerge ready to confidently lead and make a lasting impact.
