## OVERVIEW

In this STEM-designated program, you'll maximize your potential in any field as you learn to analyze data for trends and patterns that offer useful insights.

You will gain the data-centric decision-making skills employers value in today's tech-forward, global economy.

In this STEM-designated program, establish a foundation in the principles and practices of finance with the advanced analytical and technical financial skills and tools you need for an exceptional finance career.

You will also be well positioned to become a CFA or CAIA.

Fast-track your future with a program designed to meet you where you are, and the freedom to decide when you learn.

Led by our world-class faculty, our STEM-designated online program equips you with the technical knowledge, thought leadership, and problem-solving skills to move onward and upward into your next role.

Develop your management skills and your understanding of finance, marketing and economics driving the healthcare industry.

This online program is a valuable career step for current and prospective practitioners, administrators and executives.

In this STEM-designated program, develop a deep understanding of how consumers think and how to reach them, and make yourself an exceptionally prepared job candidate while you're at it.

You will learn from world-class faculty who bring a global perspective to the table.

**TUCSON**

**MASTER OF SCIENCE IN MANAGEMENT  
INFORMATION SYSTEMS**  
**ONLINE**

## OVERVIEW

**Designed for working professionals who want to gain technical mastery in the rapidly growing field of cybersecurity. You will learn from three outstanding research-based programs.**

Learn how to assess, prevent, and manage information and systems security-related risks by applying systems security management and post-breach practices through hands-on, interactive classes.

**Technology touches every aspect of business today through innovative tools, platforms, analytics and data. Be one of the professionals framing it, fueling it and driving it further.**

Solve the challenges of today's tech-driven business world by learning to use IT to support business processes and strategic needs. You'll gain valuable skills in enterprise data management and will learn to analyze business and rethink business processes.

**Amplify your career potential by learning with our world-renowned MIS faculty and doing so fully online. Solve the challenges of today's tech-driven business world by learning to use IT to support business processes and strategic needs.**

There's no need to leave your job, and several start date options per year mean you can apply and dive right in soon afterward. You can finish in as little as 10 months—transforming your work opportunities forever.
