MASTER OF SCIENCE IN MANAGEMENT
INFORMATION SYSTEMS
ONLINE

OVERVIEW

Designed for working professionals who want to gain technical mastery in the rapidly growing field of cybersecurity. You will learn from three outstanding research-based programs.

Learn how to assess, prevent, and manage information and systems security-related risks by applying systems security management and post-breach practices through hands-on, interactive classes.

Technology touches every aspect of business today through innovative tools, platforms, analytics and data. Be one of the professionals framing it, fueling it and driving it further.

Solve the challenges of today's tech-driven business world by learning to use IT to support business processes and strategic needs. You'll gain valuable skills in enterprise data management and will learn to analyze business and rethink business processes.

Amplify your career potential by learning with our world-renowned MIS faculty and doing so fully online. Solve the challenges of today's tech-driven business world by learning to use IT to support business processes and strategic needs.

There's no need to leave your job, and several start date options per year mean you can apply and dive right in soon afterward. You can finish in as little as 10 months—transforming your work opportunities forever.
