Program Introduction

The Professional MBA program utilizes the University of Arizona’s (#10 in US News ranked) Online MBA program which couples UA’s tradition of academic excellence with bold innovation, challenging and rewarding curriculum, and exceptional faculty.

The Professional MBA curriculum features a hybrid style with online and one night a week ground content. This allows us to accommodate diverse student backgrounds and interests, with classes designed to emphasize educational and career needs. This flexible schedule enables students to complete their degree in 21 months.

By joining forces with the University of Arizona’s top-10 online MBA program we can deliver the Professional MBA program core classes during the first year and enhance it with (a) in-person practicums that will focus on working with data, from modeling to visualizing to strategic decision-making. These practicums will tie together the different disciplines and provide great ways for peer-to-peer interactions, faculty guidance, case studies and business speakers. (b) Your choice of second-year specializations in Entrepreneurship, Management Information System, Management and Organizations to pursue.

Tuition includes course fees, books and other learning materials, lite dinner while on campus for practicums. Cases, ebooks*, and all lectures will be located within D2L, the University’s learning management system. Students will take midterms and final exams via Examity (an online test proctoring service). We will send information regarding pre-launch/level up activities to be done prior to launch.

Admissions

The Eller Professional MBA program looks for students who bring strengths and aspirations to our online learning environment, and who possess the ability to be part of an MBA program in which they are the co-creators of their experience.

If you’re a working professional with three or more years of experience—and sights set on leadership roles—the Eller Professional MBA Program is a great fit. Here, you can explore the specific admissions requirements and learn what materials you’ll need to gather to apply. Of course, as always, we’re here to answer any questions.

Application Requirements

A complete application consists of the following items, to be received by the noted admissions deadline:

- A completed application form (apply online)
- Application fee ($90)
- Statement of purpose
- A professional résumé
- One professional letter of recommendation
- One copy of official transcripts* from each university, college or community college attended
- GMAT/GRE not required

* We will accept unofficial versions of your school documents for initial evaluation purposes only and this acceptance does not eliminate the need for official school documents to be submitted. Also, include a copy of the grading scale or transcript key for each school transcript. Refer to the UA Graduate College transcript requirements for more information.

Applications will be reviewed on a rolling basis. Scholarships are available!

- Interviews are by invitation and will be conducted over Zoom

International Students

While the majority of the students in our evening program are domestic students, we do enroll a small number of international students, who are typically working for local companies and currently hold a visa or are a permanent resident. The University of Arizona does NOT issue student visas for this program.
Cost and Funding

The cost is $51,525* for the program. Tuition includes all eBooks and electronic course materials catered snacks.

The University of Arizona charges a $35 fee at graduation to process and mail the diploma earned.

course fees may be charged for MIS elective course material

* Costs are subject to change with the Approval of the Arizona Board of Regents (ABOR).

** There is a course fee, estimate of $2600, for travel associated with the Silicon Valley Trip in 2nd year.

Tuition Payment

Tuition payments for the Eller Evening MBA will be processed through the University of Arizona Bursar's Office.

Participants can pay using cash, check, cashier check, money order, VISA, Master Card, American Express, or company purchase order (through a financial guarantee). Details are available on the Bursar's Office website.

Students whose companies are funding their education should follow the guidelines for sponsors.

Please note that tuition, payment dates, and process are subject to change. Additional information can be found on the Bursar's Office website.

- askaid@email.arizona.edu
- 520.621.1858

Additional information regarding scholarships may be found at: https://financialaid.arizona.edu/ScholarshipUniverse

University Services

The Graduate College is dedicated to promoting and strengthening family relationships. Many resources have been designed to help graduate students balance and manage family, work, and school.

- University of Arizona Student Services
- Extension of Time to Degree Policy
- Life & Work Connections – Child and Elder Care Resources
- Disability Resource Center
Student Conduct

Eller MBA Academic Integrity Policy

We strive to prepare MBA professionals who can pursue careers in demanding and competitive environments with skill and integrity. To this end we work to foster a climate of honesty, collaboration, and respect. The Eller MBA Department’s Academic Integrity Policy follows the Dean of Student’s Policy for The University of Arizona. Our success in promoting a culture of honesty and respect will depend on the extent to which all members of the Eller community embrace these standards, holding themselves and those with whom they work accountable to them in their daily actions and words.

What is Academic Integrity?

Academic integrity is a character trait involving honesty and ethical behavior related to scholarly work. Scholarly work involves all the intellectual endeavors of a student or faculty member during their course of study/employment related to education. Pursuing a mindset of integrity is not only important during one’s academic career, but also throughout one’s life and dealings with society. Academic Dishonesty involves unethical behavior conducted by either students or faculty related to scholarship. It can involve a variety of activities from cheating to plagiarism.

Potential Consequences of Academic Dishonesty

- failing grade on assignment
- failing the course
- removal from program of study
- expulsion from university

Forms of Academic Dishonesty (this is not an exhaustive list)

- providing forged documents, using fake information, or submitting plagiarized material during the admission process
- using the same assignment for more than one class without the instructor’s prior consent
- using unauthorized materials (cheat sheets, notes, textbook, talking with other individuals, etc.) during examinations without the instructor’s prior consent
- gaining unauthorized access to examinations prior to the exam date and time
- submitting someone else’s work as your own (includes various forms of plagiarism and having someone else do the work for you)
- submitting false research or laboratory information as actual result
- using fake documents to gain an extension of time to submit work or take an examination
Academic Writing

Features of academic writing include:
- a well-crafted, thoroughly researched argument
- written with the appropriate audience in mind
- displays critical thinking, reading, and writing
- free from common errors of spelling, punctuation, syntax, and grammar
- avoids all forms of plagiarism
- cites all sources

Plagiarism
Anyone who has written or graded a paper knows that plagiarism is not always a black-and-white issue. The boundary between plagiarism and research is often unclear. Learning to recognize the various forms of plagiarism, especially the more ambiguous ones, is an important step in the fight to prevent it.

List of Reading Resources

The following is a list of selected online writing resources:
- The Purdue Online Writing Lab (OWL) – http://owl.english.purdue.edu/
  - Purdue OWL provides over 200 writing resources including information about various citation formats.
- Dartmouth University Institute for Writing and Rhetoric – http://writing-speech.dartmouth.edu
  - The Institute for Writing and Rhetoric provides a variety of resources including information about logic and argument and writing a thesis.
- George Washington University Writing Center http://www.gwu.edu/~gwriter/Resources.html
  - The GWU Writing Center provides an assortment of writing guides for various subject areas as well as other useful writing resources
All Eller MBA students must sign the Eller MBA Academic Integrity Policy

Eller MBA Academic Integrity Policy Form

All members of the Eller MBA Program are expected to know the Academic Integrity Policy's content and implications. Lack of familiarity with the policy will not excuse integrity violations.

Complete information about the Code of Academic Integrity can be reviewed at: https://deanofstudents.arizona.edu/policies/code-academic-integrity, as well as the Student Code of Conduct at https://deanofstudents.arizona.edu/student-rights-responsibilities/student-code-conduct. Violations include, but may not be limited to:

Integrity Violations in Academic Conduct:

- Direct use of the words or ideas of another without giving proper credit, including material drawn from print, televised, or electronic sources.
- Submission of the same or substantially same assignment to different instructors, without the express permission of the later instructor.
- Unauthorized use of another person's work, in part or in whole, on assignments (including work done in conjunction with another student) and in exams.
- Receiving or giving unauthorized assistance on exams, quizzes, or assignments.
- Using unauthorized materials during an exam or on assignments.

It is every student's responsibility to seek clarification from faculty on class rules before an assignment is turned in. It is unacceptable to submit an assignment and then claim lack of knowledge of the rules by which it was governed.

Integrity Violations in Personal Conduct:

- Taking or attempting to take the property of another without permission.
- Misrepresenting the truth or furnishing false information, with the intent of gaining unfair personal advantage, or causing harm to another.
- Verbal or physical harassment of any kind aimed at any individual or group.
- Inappropriate use of another student's personal information.
- Inappropriate use of D2L or other University of Arizona information systems.

Faculty members are responsible for describing rules specific to their classes beyond the general policy and will determine the penalties for violations. **Penalty for violations listed could include:**

- Failing grade for an assignment or course in which the violation occurred.
- Inability to obtain recommendation letters for graduate school or employment.
- Removal from the Eller MBA Major or Eller College.

Eller MBA follows the Dean of Students processes regarding academic integrity. Additional information regarding this can be found at: Dean of Students.
Program Requirements
Curriculum

To earn the Professional MBA degree, you must complete 45 units (credits)

Program courses begin with CORE subject matter for the first year and all are required to have a passing grade of “C” or above. Each semester will have two 8-week sessions with 2 courses in each session, Fall I and Fall II along with for credit practicum nights. In your 2nd year, you will take courses in your chosen concentration. You need to add 9 units of “elective” courses to meet 45 units.

Concentrations
Three concentrations are offered and are earned by taking specific electives. Like our on-ground MBA programs, concentrations do not appear on your diploma or transcripts; they are self-declared and may be added to your résumé:

- Entrepreneurship
- Management Information Systems
- Management and Operations
- Marketing
- MIS

University of Arizona, Eller Professional MBA Core Courses:

MKTG 510: Market-Based Management (2 units)
Market and customer analysis for product service, price, promotion, and distribution decisions; study of marketing management theories and practices to maximize customer value and satisfaction.

BNAD 562: Applied Business Statistics (2 units)
Conceptual understanding of advanced, applied, inferential statistics with emphasis on their use as a managerial decision-making tool.

ACCT 540: Introduction to Financial Accounting (2 units)
Principles and procedures underlying the financial accounting process and their application in the preparation and analysis of financial statements.
MGMT 520 Managing Ethics in Organizations (2 units)
Given the plethora of recent high-profile corporate scandals and financial misconduct on Wall Street, leading ethically is an important skill for MBA students interested in long-term success. We have seen a massive decline in the public’s trust of organizations and their leaders. Trust is an essential component of conducting business, and the ability to trust peers and business partners, and to operate in an environment where laws are taken seriously, are goals which every MBA student should strive to achieve. In this course, students will gain the ability to identify traps that business professionals fall into that result in ethical lapses and develop skills in utilizing ethical frameworks to more effectively navigate situations that are ethically grey confidently and with better results.

ACCT 545: Introduction to Managerial Accounting (2 units)
This course presents an overview of managerial accounting concepts, focusing on providing and evaluating accounting information for decision making, planning and control of operations and organizations, and strategic management.

BCOM 511: Communication for Managers (2 units)
This course introduces a strategic approach to professional communication, examines principles of effective writing and speaking, and provides practice for developing a more polished, focused, and professional persona. Key components include audience analysis, communicator credibility, message construction, design, delivery, and style flexibility.

FIN 510A: Survey of Finance as Analyst (2 units)
Survey of Finance as Analyst provides students with a rapidly paced but substantive view of the basic skills, concepts and analytical techniques employed in the Finance discipline, specifically as applied to modern corporations. This course has the perspective of the company "outsider": that of an analyst, broker, competitor, or regulator. The course is a complement to Finance 510M, which takes the perspective of the company "insider". Discussions and techniques will be of benefit to the Financial Manager and non-Financial Manager alike. Specific topics include Financial Analysis, Time Value of Money, Risk, Stock and Bond Issuance, firm valuations, and introductions to Derivatives. The knowledge and skills developed in the core economics, statistics, and accounting classes serve as the building blocks for this course.

MIS 585: Strategic Management of Information Systems (2 units)
The objective of this course is to define how a business manager can work with an IS professional to articulate the value of an IT solution (project).
FIN 510B: Survey of Finance as Corporate Manager (2 units)
Survey of Finance as Corporate Manager is the compliment to Finance 510E. In this course, we examine the Finance field from the perspective of the "insider": a corporate Finance manager, focusing on the techniques and tools they utilize in their jobs, and how those tools and techniques are significant for the managers in other disciplines (operations, marketing, and management). We examine the basic tools of finance -- Time Value of Money and Risk analysis, then show how these tools are applied in corporate decision making -- encompassing Capital Budgeting, Real Options, Working Capital Management, and Capital Structure analysis. Computational processes and analytic techniques will be the feature of most of the course; additionally, spreadsheet analysis tools will be featured.

MGMT 501 Leadership in Organizations (2 units)
During the course, we will be examining and evaluating several theories and techniques for leading individuals, as well as exploring the concept of corporate social responsibility. At the end of this course, participants should be able to translate theories into more specific competencies that will improve their ability to lead and manage in today's corporate and non-profit environment.

ECON 551: Business Strategy (2 units)
This course is concerned with the long-term strategy of a business organization, identifying and analyzing past and current strategies and discusses formulating and implementing new ones.

OSCM 560: Operations Management (2 units)
Organizations use their operations to achieve their strategic objectives. While operations can be diverse, they have characteristics in common. This course focuses on those common attributes. The class will focus on managing processes, inventory, supply chain management, and the integration of operations with strategic issues.

ECON 550: Economics for Managers (2 units)
Firm decision making to sustain competitive advantage in the context of different market structures and regulatory environments.

MKTG 579E: Marketing of Innovations (2 units)
To develop innovations more effectively, organizations must understand the customers and markets that they intend to serve. This course provides a market-based view of innovation and entrepreneurial activities with a focus on how to apply an effective process to identify new product and entrepreneurial opportunities, and to develop an appropriate plan to bring the product to market. The course covers topics such as the emergence of innovative ideas, new product development within and beyond organizational boundaries, innovation in an entrepreneurial environment, and marketing strategies for innovations.
BNAD 505: Strategic Innovation (3 units)
This module will examine the innovation process including the development of the business case necessary for achieving success in the market. During this module students either individually or in teams will be expected to define the scope, timelines, and milestones for completing their project during the remaining modules of the program. In addition, they will apply the learning from this module to plan a product or service introduction from their assigned company.

Technical Practicum: Data savvy leadership begins with foundational concepts and progresses to more advanced applications of software products. Recent experience with UA graduate students (MBA & MIS) has been informative: very few, if any, are well-versed in even general software, such as MS Office products. These products, along with more advanced software products such as Tableau and Power BI are critical to student and professional success, in terms of time management, quality of submissions and, more broadly demonstrating technological savvy. Feedback in [on-ground MBA/MSMIS] program offerings has been robustly positive, as students learn to use tools that save them significant time and allow them to focus more on class content. More advanced technical topics are an opportunity to introduce students to industry professionals who can expand the scope of workshops focused on transferable skillsets. Creating classroom learning scenarios around real-life datasets and creating models and visualizations will give students the opportunity to stretch their learning goals. These topics can be built out collaboratively with faculty to complement what is taught in their classes and give students tools for success.

The first module in the practicum relates to strategies associated with Product and Brands, Channels and pricing and most importantly Managing marketing communications that Jesper covers in MKTG 510. With the rapid diffusion of Artificial intelligence and Internet of things technology in business, managers today are increasingly using connected technology to formulate business strategy. The core idea of such connected business strategies is to get hands on development of business models and strategies (product, brand, channels and communications) that delivers a continuous rather than episodic customer relationship. Through a set of workshops (see below), in this module, we will apply marketing strategies for the organization that the students are working in or to an organization that they choose to analyze. Apart from being a follow up application to MKTG 510, these workshops develop the following competencies as outlined in the RFP - interpreting business models, sustainable business platforms and ecosystems; outlining value propositions and user centered designs.

According to the alumni practicum survey, emotional intelligence and adaptability are considered the third most important skill sets for working professionals. Indeed, these are foundational — not “soft” — skills that every professional needs to master in order to effectively lead others. This practicum builds on the work students will complete in BCOM 511 by focusing on the nexus of communication efficacy: the three quotients, IQ, EQ (emotional intelligence), and AQ (adaptability).

As the Human Resources function has shifted from a purely administration focus to becoming more of a strategically in managing overall business performance, most organizations have recognized that people are their most important assets. Consequently, the field of HR analytics has grown and increased in importance over the past few years. Increasingly organizations have launched HR analytics departments and/or have initiated HR analytics projects. Even if the organization has an HR analytics group, the role of understanding and quantifying the value of human capital to drive business outcomes is the role of all leaders. This practicum will explore techniques to improve decisions that relate to the core people processes of hiring, turnover, employee retention, engagement, performance, talent planning and diversity and inclusion.

<table>

<tr>
<td>Summer 2/Practicum BNADS596B</td>
<td>Joe Carella</td>
<td><a href="mailto:carella@arizona.edu">carella@arizona.edu</a></td>
<td>Scenario Planning and Strategic Decision Making</td>
</tr>
</tbody>
</table>

The purpose of this practicum is to explore how managers and leaders use scenario planning as a sense making and foresight tool to help reduce risk and increase efficiency. Using Scenario planning is a disciplined method for imagining possible futures that companies have applied to a great range of issues. Royal Dutch/Shell has used scenarios since the early 1970s as part of a process for generating and evaluating its strategic options. Scenario planning works as an extension of predictive analytics by identifying detailed and realistic narratives to help direct one’s attention to aspects one would otherwise overlook. Scenarios attempt to interpret predictive analysis and simulation outputs by identifying patterns and clusters among the millions of possible outcomes one might generate. They often include elements that were not or cannot be formally modeled, such as new regulations, value shifts, or innovations. In this sense, scenarios go beyond objective analyses to include subjective interpretations.

<table>
<thead>
<tr>
<th>Fall 1/Practicum BNADS596A:</th>
<th>Aleks Ellis</th>
<th><a href="mailto:aleks@arizona.edu">aleks@arizona.edu</a></th>
<th>Leading Change in Organizations</th>
</tr>
</thead>
</table>

Leading Change in Organizations will focus on developing knowledge and skill designed to overcome resistance that is typical in most change initiatives. The practicum will revolve around the use of an interactive change management simulation developed by Experience point, where teams plan and implement change at a fictitious organization, Globaltech. The simulation provides interactive and real time feedback to participants and is much more involved than typical simulations (e.g., Harvard). The simulation costs $75 per student.

<table>
<thead>

<th>Price Fishback</th>
<th><a href="mailto:fishback@arizona.edu">fishback@arizona.edu</a></th>
<th>Economic and Business Reasoning with Data</th>
</tr>
</thead>
</table>

My plan is to build on the statistics, economics, strategy, and business courses in the first year of the program. For this course to work, the students must have already had statistics and economics. The goal is to have the students work on projects related to their own businesses. The projects might involve analyzing data sets using regressions, make decisions using cost-benefit analysis, analyze the markets in which they are operating, or analyze the effects of government policies.

</thead>
</table>

We know that research has shown that close to 70% of call change efforts fail. Recent research by Gartner estimated that between 60-85% of big data projects failed. The benefits of a more data driven organization may be readily apparent, the changes people and organizations must make to realize those benefits are often overlooked. Data analytics projects can disrupt business models, business relationships, decision making processes and power structures, causing people to be uncomfortable and fearful as they learn new skills and navigate a new landscape. Understanding, applying and practicing change leadership principles and tactics in this context can increase the likelihood of a successful implementation.
Concentrations

Management Information Systems (MIS) Electives

MIS 511: Social and Ethical Issues of the Internet (3 units)
Broad survey of the individual, organizational, cultural, social and ethical issues provoked by current and projected uses of networked computers on the Internet.

MIS 515: Information Security in Public and Private Sectors (3 units)
This course exposes students to a broad range of cyber and information security topics focused on awareness of confidentiality, integrity, and availability. Course is approved by NSA/Committee on National Security Systems and accepted as a model curriculum course for the Information Systems Audit and Control Association (ISACA).

MIS 516: Information Security Risk Management (3 Units)
The objective of this course is to provide students with a thorough and operational knowledge of information security so that this critical area is recognized as a management issue and not an I.T. issue.

MIS 578: Project Management (3 units)
This course will take students through a typical process of managing projects, including organizing, planning, and performing projects; and will present to students a scientific, systematic approach to project management.

MIS 545: Data Mining for Business Intelligence (3 Units)
Corporations today are said to be data rich but information poor. For example, retailers can easily process and capture millions of transactions every day. In addition, the widespread proliferation of economic activity on the Internet leaves behind a rich trail of micro-level data on consumers, their purchases, retailers and their offerings, auction bidding, music sharing, so on and so forth. Data mining techniques can help companies discover knowledge and acquire business intelligence from these massive datasets. This course will cover data mining for business intelligence. Data mining refers to extracting or "mining" knowledge from large amounts of data. It consists of several techniques that aim at discovering rich and interesting patterns that can bring value or "business intelligence" to organizations. Examples of such patterns include fraud detection, consumer behavior, and credit approval. The course will cover the most important data mining techniques --- classification, clustering, association rule mining, visualization, prediction --- through a hands-on approach using XL Miner and other specialized software, such as the open-source WEKA software. It is helpful to have statistics/linear regression knowledge as well as knowledge of R language.

MIS 561: Data Visualization (3 units)
Visualizing data is an important step in understanding data, exploring relationships, and "making a case." The goal of this class is to introduce students to principles and tools of data visualizations, and create visualizations using appropriate tools for two different but related purposes: (1) exploration; and (2) presentation. The first part is about trying to understand the data and test hypotheses that drive the data visualization effort and formulate a story; the second part is to convey that finding to others in a convincing manner.
Entrepreneurship (ENTR) Electives

ENTR 523R: Customer Focused Entrepreneurship (3 units)
This course is an experiential, laboratory-like experience where students learn to develop customer driven products or services. Students will learn entrepreneurship by practicing a data-driven approach to entrepreneurial decision making and applying fundamental techniques like requirements gathering, hypothesis development, experimentation, testing and validation.

ENTR 554: Leading and Organizing for Innovation (3 units)
This graduate level course will focus in on what is increasingly understood to be a primary reason for the gap between aspirations and outcomes for innovation and entrepreneurship: the leadership and organization of the innovative process.

ENTR 506: Principles of Entrepreneurship (3 units)
Purpose of course is to introduce entrepreneurial principles used in identification and assessment of economically viable business opportunities. Graduate-level requirements include engagement in an advanced level of critical classroom dialogue, a feasibility study requiring gathering and assessing background data on a social and/or economic problem with a potential entrepreneurial solution to the identified problem.

ENTR 534: Industrial Analysis and New Venture Development (3 units)
Value maximization; simulation of value distribution; sources of venture capital; timing of initial public offering; new venture ownership structuring

ENTR/MGMT 588: Social Entrepreneurship (3 units)
Focusing your business and entrepreneurial skills on social and/or environmental problem solving. Graduate-level requirements include the experience to pitch the social entrepreneurship venture they have developed. Also the graduate students will have the experience to facilitate classes.

Management and Operations Electives

BNAD 523: Business Law (2 units)
Law permeates virtually all aspects of business, and thus a basic understanding of business law is critical for managers. In that regard, this course introduces students to the fundamentals of contract law, corporate law, securities regulation, employment law, mergers and acquisitions law, and property law. We will cover the principal legal rules and issues in these areas and discuss how they impact business operations and transactions.
**ECON 555: Macroeconomics & Forecasting (3 units)**
An understanding of the larger economy is essential to making good business decisions. This course examines how macroeconomic performance is measured, how monetary and fiscal policies influence macroeconomic performance, and how these relate to individuals and businesses. The course also provides students with an understanding of how macroeconomists produce forecasts and how those forecasts should be used. Students will learn macroeconomic concepts and immediately apply them to real world scenarios using macroeconomic data. The focus will be on analytical skills that will allow the student to apply macroeconomics to the real world in real time.

**ECON 556: Health Economics (3 units)**
Healthcare expenditures now account for more than 17% of Gross Domestic Product in the United States, and health care reform, targeted at improving access to and quality of care while also slowing cost growth, is evolving rapidly. This course explores the sources of funding for those expenditures and the rapidly changing trends therein, including analysis of current spending parameters, the demand for insurance, and historical and contemporary consequences of insurance.

**MGMT 524: Groups and Teams (3 units)**
This course is designed to provide students with the knowledge and skill needed to maximize performance in today’s team-based work environments. The course will progress according to the classic forming, storming, norming, performing, and disbanding model of team development. Students will, for example, learn how to identify the best team members, motivate the team to achieve organizational objectives, resolve conflict within the team, and improve outcomes such as team decision-making and group creativity.

**MGMT 566: Negotiations (3 units)**
Successful leaders and managers understand that negotiation skills greatly aid them to achieve their own and their organization’s goals. This course introduces students to the basic elements of negotiations, including preparing for negotiations and selecting the best negotiation strategy.

**MKTG 530: Integrated Marketing Communications (3 units)**
This course focuses on integrated marketing communications, which includes packaging, advertising, web sites, promotions, press releases, corporate facility design and layout, in-facility signage, employee attire, employee pamphlets, corporate policies, corporate communications, and annual reports; ALL firm-authored communication to its various constituents. We will be evaluating the execution of planned and emergent corporate and marketing communications, and designing integrated, effective, new brand communications. You will be responsible for conducting primary and secondary research, recognizing branding and communications theories in action, and creating effective corporate communications and marketing campaigns. We will be focusing on healthcare. Specifically, we will be narrowing in on consumer data streams, improved diagnostics, and consumer compliance to healthcare regimes.
MKTG 572: Marketing Research for Managers (3 units)
This course is designed to provide an overview of applied research methods as used in marketing research and as tools to help make effective marketing decisions. The course is for managers who will be using marketing data rather than those doing "marketing research". 510 A and FIN 510 B must be taken with a grade of “B” or better to enroll in this course.

MKTG 531: Social Media Marketing (3 units)
This course is designed to introduce students to the complexities of social media marketing through revealing foundational theories and associated concepts of collective behavior, social influence, and social media marketing.
Mission and Outcomes

The Eller College of Management’s mission is:

...to discover and share new knowledge that shapes the future of business and to educate the next generation of responsible, global leaders who embody the changing business world and possess the knowledge and drive to impact it.

The Eller Way
As students, faculty, and staff members at the Eller College of Management, we embrace a long and sustained culture of excellence. Our school is nationally recognized, and our contribution is critical to our continued elevation. Our standards are high and call us to:

Integrity

*Do the right thing 100 percent of the time.*

Innovation

*Creatively anticipate and leverage change.*

Excellence

*Consistently surpass ordinary standards.*

Determination

*See challenges as opportunities.*

Inclusion

*Create a community where everybody thrives.*

In addition to the Eller Way values, the following set of learning outcomes was developed to assess the knowledge and skills attained by Eller MBA graduates.

Critical Thinking

- Demonstrates the ability to identify a problem and the information needed to develop a solution, develop alternative solutions, recommend the best solution, and evaluate the efficacy of the solution after it has been implemented.
- Demonstrates the ability to articulate both sides of an argument, evaluate the quality of arguments and evidence, and construct and defend the position taken.
- Explores innovative alternatives during the problem-solving process

Communication

- Expresses written information appropriate for a given audience with conciseness and clarity.
- Demonstrates the ability to prepare and deliver a professional presentation on a business topic.
• Demonstrates active listening.
• Effectively utilizes data in written and oral presentations to communicate ideas.
• Demonstrates proficiency in written and oral business communications.

Collaboration

• Provides and receives feedback, ideas, and instruction in a professional manner.
• Organizes tasks and delegates responsibility to complete collaborative projects in a timely manner.
• Explains the role and impact of each team member (including self) on the collaborative project.
• Effectively works with a diverse, cross-functional team towards a common goal.

Business Knowledge

• Demonstrates the ability to understand markets and financial theories through appropriate analysis and reporting.
• Formulates an operations strategy that supports the competitive strategy of the firm and provides a means to achieve a competitive advantage.
• Demonstrates an understanding of current theories of management and leadership.
• Employs statistical data analysis and management science as a support to decision-making processes throughout an organization.
• Demonstrates an understanding of the domestic and global economic environments of organizations.
• Demonstrates an understanding of business strategy and performs analysis of competitive markets to recommend strategies.
• Applies marketing strategies and tactics as a way of understanding customers and competitors to create profitable firms and organizations.
• Describes how information technology and information systems influence the structure and processes of organizations and economies, and the roles and techniques of management.

Technology

• Demonstrates the ability to use business software and technology appropriately.
• Utilizes technology appropriately in research contexts.

Ethics/Social Responsibility

• Identifies ethical dilemmas and develops appropriate courses of action that consider the well-being of others and society.
• Develops an understanding of the role of legal and social responsibility in organizations and society.
• Engages in public service and professional development activities.
Leadership and Professional Skills
- Demonstrates leadership and appropriate inter-personal skills.

Professional Skills
- Applies knowledge in new and unfamiliar circumstances through a conceptual understanding of relevant disciplines.
- Demonstrates the ability to adapt and innovate to solve problems, to cope with unforeseen events, and to manage in unpredictable environments.
- Leverage’s skills and experiences for career success.
Academic Requirements/Grades

Degrees

Graduate degrees will only be awarded to students that complete the program with a GPA of 3.0 or better, are in good standing with the University and are current on all University bills.

D or E Grade

If a grade of D or E is earned the course must be repeated.

- There is no grade replacement at the graduate level; therefore, the D or E will factor into the GPA
- The failed course will not count towards course completion requirements for graduation.

Students who have a cumulative grade-point average of less than 3.0 will be placed on academic probation under the following conditions:

- Required to meet with the program advisors.
- Must devise a written plan of action to be submitted to the Graduate College
- After a student is placed on academic probation, they will be allowed to register for one additional term
- Students whose GPA is below 3.0 for two consecutive semesters will be disqualified from the MBA program.

“I” Incomplete Grade

The grade of I may be awarded only at the end of a session when all, but a minor portion of the course work has been satisfactorily completed. The grade of I is not to be awarded in place of a failing grade or when the student is expected to repeat the course; in such a case, a grade other than I must be assigned. Students should make arrangements with the instructor to receive an incomplete grade before the end of the term.

If the incomplete grade is not removed by the instructor within one year (the last day of finals one year later), the I grade will convert to a failing grade. For graduate courses, the one-year extension must be approved by the instructor and Graduate College dean, before the grade goes to an E, not after the fact. This extension requires the instructor and dean's signature on a Petition for Extension of Course Work.
“W” Withdrawal, Dropping a Course:

Prior to the beginning of the second week of classes, official withdrawal (drop) of a course cancels the registration for the course. No approval is needed. No grade for the course will appear on the student's permanent record.

During the next three weeks, students may use UAccess Student Self-Service to withdraw from a course. No approval is needed. The grade of W is awarded regardless of whether the student is passing at the time of withdrawal. The W will appear on the student's permanent record.

After the fifth week of classes, the grade of W can be awarded only with the approval of the student's instructor and academic dean, and only under exceptional circumstances.

In the case of complete Withdrawal from the University, if a student withdraws before the end of the fourth week for graduate and professional students, no classes show on the student's permanent record. If a student withdraws from the University after the fourth week for graduate and professional students and before the final exam period, the grade of WC (withdrawal-complete) is awarded for all classes processed in the complete withdrawal.

Leave of Absence

General Information

It is not necessary for a student to apply for a Leave of Absence (LOA) if he or she has a registration record for that semester. A "W" counts as a registration record. A LOA is inappropriate for a student who withdraws from all classes after the start of a semester and gets "W" grades since a LOA presupposes no registration at all for a term. Since, in such cases, the student has maintained continuous enrollment by having a registration record, he or she is eligible to register the following semester (or Summer or Winter term) and will suffer no adverse effects due to the fact that he or she was not eligible to apply formally for a Leave.

Only academic services or facilities available to the general public can be used during the LOA. LOA’s may affect the status of a graduate student’s financial aid. Students are responsible for determining the requirements of their funding agency and/or academic unit prior to applying for a LOA.

If a student fails to register and does not have a Leave of Absence on file, the student will be discontinued from their program. A new application will be necessary for the student to continue in the program. Re-admission is not guaranteed. See Continuous Enrollment and Re-admission Policies for more information.
Academic Leaves
Academic LOAs (i.e., leaves to take course work at another university, for research, field work, internships, professional development, etc.) are handled on a case-by-case basis by the student’s department and the Graduate College.

Medical Leaves
Graduate students in degree or certificate programs may be granted a Medical Leave of Absence by the Dean of the Graduate College. Further information may be found at: Leave of Absence.

Personal Leaves
Graduate students in degree or certificate programs are typically granted a LOA for only one year throughout the course of their degree program. When circumstances warrant, this may be extended beyond one year with approval from the Dean of the Graduate College. LOAs are granted on a case-by-case basis for compelling reasons including birth or adoption of a child, personal or family reasons, medical reasons, military duty, or financial hardship. Students will maintain their status without reapplying to the department and the Graduate College at the expiration of the LOA.

Retroactive Leave of Absence
A retroactive leave request is any request made after the last day of finals in the semester. If a student does not request the leave by the last day of finals, he or she would need to apply for re-admission to the program. Under extraordinary circumstances, LOAs may be granted retroactively. In such cases, students will be readmitted without reapplying to the department and the Graduate College.

Requesting LOA
Students may request a Leave of Absence by submitting the Leave of Absence form to the program director.
Policies

Policies and Procedures

Graduate students are expected to follow all policies and procedures of Eller MBA and the UA Graduate College. It is the student’s responsibility to stay up to date on changes and to comply with the most current policies and procedures.

Program Policies

All-Inclusive Program
The Professional MBA program cost is $51,525 for 39 core courses and 9 elective units for a total of 45 units (+$2600 Silicon Valley Experience).

The PMBA Program Costs Include:

- Tuition for MBA courses, including electives, during the 21-month program
- Course materials including textbooks in eBook format, articles, case studies, simulations, etc.
- Desire 2 Learn (D2L) access
- Lite dinner and beverages on practicum days
- Wildcat Launch/orientation presented both in person and virtually
- Strategic Innovation Experience (domestic experience includes hotel, activities and transportation, and most meals. Does not include domestic airfare and personal spending.)

1 Additional costs include a non-refundable $90 application fee

The Professional MBA program is an all-inclusive program. The components above are imbedded in the assessed tuition and fees and are not allocated between components.

Refunds are not available for any portion of the tuition and fees, even if individual components are not utilized.

*Students who take a leave of absence from the program may be subject to additional tuition and fee charges.*
**Platform Change**

Eller MBA consists of five platforms: Professional MBA, Evening MBA, Full Time, Executive, and Online. Each program has unique elements that meet the needs of different student demographics. We make every effort to coach students into the right platform fit prior to starting their program.

Changes in platform after starting a program is not encouraged. However, we understand that, at times, changes are necessary. Students who are in good academic and financial standing may request a change in platform under two circumstances: documented work relocation, documented health challenges preventing continuation.

All platform changes are approved on a case-by-case basis, after review of submitted documentation. If approved, changes in tuition and other program fees may be applicable. *Please note: scholarships, discounts, and other tuition reduction programs do not transfer across platforms. Additionally, program management cannot guarantee similar expected graduation times.
Appeals

Graduate students have the right to request an exception or appeal of any policy or procedure. Eller MBA students may do this through contacting their program director. On a case-by-case basis, we will review exceptions to the policies for extenuating and compelling circumstances. Please complete the form and provide any additional documentation to your Program Director.

Eller MBA believes in creating an exceptional student experience that is fair and equitable for all. Requests are reviewed by Director Committee or by the MBA Associate Dean. Every exception decision is made based on each situation and circumstance.

A review of your request does not guarantee the request will be granted.
Graduation

In addition to meeting all of the program requirements, having a GPA of 3.0 or better as well as being current with all university bills, there are several forms that you will need to complete in order to be eligible for your program completion and graduation. These forms are collectively called GradPath forms.

GradPath Forms
To access your GradPath Forms you will need to log on to your UAccess account. From your drop down menu select GradPath Forms. The following four (4) forms must be completed in sequential order.

1. Responsible Conduct of Research Statement
   This form is an acknowledgement and acceptance of the University’s Academic Code of Integrity. *This form should be completed in the first month of your last semester.* Completing this form allows you to access the next form in the GradPath.

2. Master’s Plan of Study (MPoS)
   This form documents your entire program coursework and academics. *This form should also be completed in the first month of your last semester.* Please list Paige Bausman as your Faculty Advisor. If your Plan of Study gets declined, you will receive an automated message alerting you. Once you log into UAccess and view your GradPath forms, you will be provided with a reason for the denial and instructions on how to proceed.

3. Master’s Committee Appointment Form
   This form will not be available until the MPoS has been approved. Pending the submission and approval of your MPoS, this form must be completed by the third month in your final semester. When asked whether or not you have a committee answer NO.

4. Master’s Completion Form.
   This form requires no action on your part. The MBA Department will report completion for a master’s student to notify the Graduate College that the student has satisfied all departmental requirements for the degree. Your MBA Program Director (Pamela Jorden) will complete this form.
Career and Professional Development

What We Do?
We educate and empower students to apply their professional development skills to achieve their career goals.

eSMS – Students will use eSMS to schedule coaching appointments and register for events. Sign in with your NetID and password at https://student.esms.arizona.edu.

JobCats – Eller MBA Professional Development produces a weekly e-newsletter for students that communicates important events and lists new MBA level internships based on industry. Send us an e-mail request to opt-in: ellermbacareer@eller.arizona.edu

Professional Development Resource Center (D2L) – This site houses many great resources for MBA students. It is accessible on your D2L page as “Professional Development Resource Center" and go to the "Resources & Trends" folder.

Company Information Sessions – Company presentations are a great forum for students to learn about different companies and career opportunities, as well as meet directly with company representatives. Companies host info sessions each semester. Sign-up to attend through eSMS.

BNAD 514 – The Professional Development Team offers this Career Management course twice a year in Online MBA and as an elective for the Professional MBA students. Learn how to tailor your resume, update your LinkedIn, and start your job search. Register today!

What Students Should Do?
Eller MBA offers many resources to students to support your career journey. You are the driver of your own path, and here are some professional development steps you can take.

Take the CareerLeader Assessment. Assess your interests, motivators, skills and potential career matches. Think about how you would like to advance your career. Then, begin researching the functions and industries that appeal to you. To access the assessment, send an e-mail to: ellermbacareer@eller.arizona.edu

Update your résumé and LinkedIn profile - Use the EllerMBA Résumé Template that can be found on the Professional Development Resource Center of D2L to update your current résumé. Schedule a meeting with the professional development team to review any of your job search/application documents.

Jobscan - This platform provides resume key word optimization, compares your resume with the job posting and determines the level of match. For access, send an e-mail to: ellermbacareer@eller.arizona.edu
Network! You never know who may be able to help connect you to your next step. Reach out and talk to former colleagues, classmates, friends, and family to start, and then build out your network with alumni and employees in your function or industry of interest. Join the Eller MBA Networking Group on LinkedIn today to get started!

Job Search Resources

MBA Exchange - Search and apply to thousands of MBA level jobs and development programs, access both employer directories and country guides. For access, send an e-mail to:  
ellermbacareer@eller.arizona.edu

Please read the following statement and indicate your agreement by providing your signature below.

I understand that my registration for courses in the program will **only be completed upon receipt of my Eller MBA enrollment form, my holding fee, and clearance from Campus Health regarding mandatory immunizations.**

For subsequent courses, I understand that in order for my registration to go smoothly, I must clear any holds in UAccess, have my tuition account paid in full and maintain good academic standing with a cumulative GPA of 3.0 or better.

I have read the Eller MBA Student Conduct, starting on page 7 of this document, and I understand and agree to fulfill the requirements therein and my program’s expectations. If I incur a challenge in fulfilling the expectations and responsibilities, I will first contact my program director to discuss the matter. I understand that failure to meet any of the following criteria will subject me to consequences including those listed by the Dean of Students. Requirements include but are not limited to the following:

- Maintain good standing with the University
  - **Academic Requirements** as defined by the Graduate College
  - **Code of Academic Integrity** as defined by the Dean of Students
- Meet the expectations outlined in the **Student Code of Conduct** as defined by the Dean of Students
- Fulfill financial obligations and work directly with the Bursar’s office, Veteran’s Affairs, and Financial Aid to maintain good standing
- Maintain professional appearance and decorum
- Complete and contribute effectively to group work
- Complete program surveys
- Fulfill my expectations as defined by the program.

Thank you for taking the time to read the Professional MBA Student Handbook. If you have any questions or comments about this Handbook, please contact the PMBA staff.

Please sign one Acknowledgment page and return to PMBA Assistant Director, Patrice Courtney, stating that you have read, understand, and agree to abide by the guidelines and procedures outlined in the Professional MBA Student Handbook, including the Academic Requirements, Code of Academic Integrity and Student Code of Conduct guidelines.
